

TABLE OF CONTENTS

SECTION 1: INTRODUCTION	1
1.1: Purpose and Scope of Manual	1
1.2: Organization of the Manual	1
1.3: Design Philosophy	2
1.4: History of Segmental Retaining Wall Use	3
1.5: Advantages of Segmental Retaining Walls	3
1.6: Summary of Changes Incorporated into 3 rd Edition	4
SECTION 2: SEGMENTAL RETAINING WALL COMPONENTS	7
2.1: Segmental Retaining Wall Units	8
2.1.1: Dimensions	8
2.1.2: Mix Design, Compressive Strength and Dimensional Tolerances	10
2.1.3: SRW Performance Properties	10
2.1.3.1: Connection Strength between Geosynthetic Reinforcement and SRW Units	11
2.1.3.2: Determination of Shear Strength Between SRW Units	12
2.2: Leveling Pads	13
2.3: Gravel Fill and Drainage Materials	13
2.4: Soils	14
2.4.1: Soil Classifications	15
2.4.2: Soil Shear Strength	15
2.4.2.1: Different Shear Strengths for Saturated Clays	19
2.4.3: Soil Properties Required for Design of SRWs	20
2.5: Geosynthetic Reinforcement	22
2.5.1: Reinforcement Concepts	23
2.5.2: Long-Term Design Strength	24
2.5.2.1: Determination of the Long-Term Design Strength of the Geosynthetic	24
2.5.3: Soil-Reinforcement Interaction Performance	25
2.5.3.1: Coefficient of Interaction for Pullout	25
2.5.3.2: Coefficient of Direct Sliding	26
SECTION 3: ROLES AND RESPONSIBILITIES ON PROJECTS INVOLVING SRWS	27
3.1: Overview of Roles	27
3.2: Site Civil Engineer Suggested Roles Overview	29
3.3: Geotechnical Engineer Suggested Roles Overview	30
3.4: SRW Design Engineer Suggested Roles Overview	31
3.5: Construction Observation and Testing Suggested Roles Overview	32
SECTION 4: WALL LAYOUT AND PLANNING	33
4.1: Wall Layout Example	33
4.2: Site, Grading, and Utility Plans	34
4.2.1: Location of Retaining Walls	34
4.2.2: Property Lines and Other Space Limitations	34

4.2.3: Utilities	36
4.2.4: Contour Lines	37
4.2.5: Loading Features.....	37
4.2.6: Miscellaneous Features	37
4.2.7: Scale	38
4.2.8: Additional Information.....	38
4.3: Retaining Wall Layout	38
4.4: Design.....	38

SECTION 5: SEGMENTAL RETAINING WALL DESIGN OVERVIEW.....	43
5.1: Conventional SRW Concepts.....	44
5.2: Reinforced SRW Concepts	44
5.3: Potential Failure Modes for Segmental Retaining Walls	44
5.3.1: External Stability.....	46
5.3.2: Internal Stability.....	46
5.3.3: Facing Stability	46
5.3.4: Internal Compound Stability	46
5.3.5: Geotechnical Concerns.....	47
5.4: Earth Pressure and Forces.....	49
5.4.1: Active Earth Pressure Coefficient.....	51
5.4.2: Failure Surface Orientation, α	51
5.4.3: Interface Friction Angle, δ	52
5.4.4: Horizontal and Vertical Components.....	52
5.5: Design Height and Embedment	53
5.5.1: Design Height for SRWs.....	53
5.5.2: Embedment Requirements	53
5.6: Top of Wall Conditions	54
5.6.1: Infinite Slopes	54
5.6.2: Broken Backslopes.....	54
5.6.3: Surcharge Loading	55
5.6.3.1: Live and Dead Loads	55
5.6.3.2: Modeling as Uniform	55
5.6.3.3: Offset Surcharges	55
5.6.3.4: Line Loads or Point Loads	56
5.6.3.5: Tiers as Surcharges.....	56
5.7: Water and Drainage.....	56
5.8: Seismic Loading	57
5.9: Special Conditions	57
5.9.1: Tall Walls	57
5.9.2: Tiered Walls	58
5.9.3: Sloping Toe Concerns	60
5.9.4: Foundation Stability	60
5.9.5: Global Stability	60
5.10: Recommended Minimum Factors of Safety and Design Criteria.....	60
5.10.1: Maximum Vertical Spacing of Geogrid	60
5.10.2: Minimum Geogrid Length	60

5.10.3: Maximum Wall Height.....	61
5.10.4: Factors of Safety and Design Criteria Summary.....	61
SECTION 6: CONVENTIONAL SEGMENTAL RETAINING WALL DESIGN	63
6.1: Design Assumptions	63
6.1.1: Coulomb Earth Pressure Theory.....	63
6.1.2: Loading Assumptions.....	63
6.1.3: Single- and Multiple-Width SRWs.....	64
6.2: Minimum Factors of Safety for Stability Analyses	64
6.3: Segmental Unit Properties	64
6.4: External Stability	64
6.4.1: Earth Pressures and Forces.....	64
6.4.1.1: Top of Wall Geometry for Equivalent Slopes	66
6.4.1.2: External Earth Forces and Locations	68
6.4.2: Weight of Segmental Retaining Wall.....	69
6.4.3: Base Sliding.....	69
6.4.4: Overturning.....	69
6.4.5: Bearing Pressure	71
6.5: Internal Stability	72
6.6: Example Calculations	73
SECTION 7: REINFORCED SOIL SEGMENTAL RETAINING WALL DESIGN	75
7.1: Design Assumptions	75
7.1.1: Coulomb Earth Pressure Theory.....	75
7.1.2: Reinforced Zone Width.....	76
7.1.3: Loading Assumptions.....	76
7.2: Recommended Factors of Safety and Design Criteria.....	77
7.2.1: Geogrid Length Requirements	77
7.2.2: Geogrid Vertical Spacing Requirements.....	77
7.2.3: Geogrid Coverage Requirements.....	77
7.3: Properties for Reinforced SRW Design	77
7.4: External Stability of Reinforced SRWs	78
7.4.1: Wall Geometry Dimensions for External Analyses.....	79
7.4.1.1: External Earth Forces and Locations	83
7.4.1.2: Offset Dead Surcharge Loads (q_{offset}) and Geometry for Resisting Equations.....	84
7.4.1.3: Soil Weights	86
7.4.2: Base Sliding.....	87
7.4.3: Overturning.....	88
7.4.3.1: Resisting Moments.....	88
7.4.3.2: Overturning (Driving) Moments.....	90
7.4.3.3: Overturning Factor of Safety	90
7.4.4: Bearing Pressures for Geotechnical Foundation Analysis.....	90
7.5: Internal Stability of Reinforced SRWs	91
7.5.1: Internal Earth Pressures and Failure Plane.....	93
7.5.1.1: Backslope Geometry for Internal Earth Pressures	93
7.5.1.2: Overall Internal Forces.....	94

7.5.1.3: Internal Failure Plane	95
7.5.2: Load on Individual Reinforcement Layers	96
7.5.2.1: Determination of Minimum Number of Geogrid Layers	96
7.5.2.2: Contributory Area.....	96
7.5.2.3: Midpoint of Contributory Area.....	98
7.5.2.4: Applied Tensile Load of Reinforcement Layers.....	98
7.5.3: Tensile Overstress of Reinforcement Layers.....	98
7.5.4: Pullout of Reinforcement	99
7.5.4.1: Anchorage Capacity of Reinforcement.....	99
7.5.4.2: Pullout Factor of Safety.....	100
7.5.5: Internal Sliding Failure.....	100
7.5.5.1: Internal Sliding Forces	100
7.5.5.2: Internal Sliding Resistance	103
7.5.5.3: Factor of Safety Internal Sliding at Each Reinforcement Layer	104
7.6: Local Stability of SRW Units.....	104
7.6.1: Facing Connection Strength	105
7.6.2: Crest Toppling.....	107
7.6.3: Offset Surcharge Load Reduction in Facial Calculations.....	108
7.7: Example Calculations	110
SECTION 8: INTERNAL COMPOUND STABILITY.....	111
8.1: Model.....	112
8.2: Unreinforced Section	113
8.3: Reinforced Section.....	114
8.4: Contribution of the Reinforcement.....	115
8.5: Contribution of the Facing.....	116
8.6: Summary.....	117
8.7: Example Calculations	119
SECTION 9: SEISMIC DESIGN OF SEGMENTAL RETAINING WALLS	121
9.1: Design Assumptions	121
9.1.1: Assumptions.....	121
9.2: Calculation of Earth Forces and Failure Plane	121
9.3: Distribution of Seismic Earth Pressures	124
9.4: Seismic Acceleration Coefficients	125
9.5: Inertial Forces	126
9.6: Surcharge Loads.....	127
9.7: Conventional Segmental Retaining Walls	127
9.7.1: External Stability	128
9.7.1.1: Base Sliding (Refer to Section 6.4.3)	128
9.7.1.2: Base Overturning (Refer to Section 6.4.4)	129
9.7.1.3: Bearing Pressure (Refer to Section 6.4.5).....	129
9.7.2: Internal Stability	130
9.7.2.1: Internal Sliding (Refer to Section 6.5).....	130
9.8: Geosynthetic Reinforced Segmental Retaining Walls	130
9.8.1: External Stability	130

9.8.1.1: External Earth Forces and Locations	131
9.8.1.2: Internal Forces and Locations	132
9.8.1.3: Base Sliding	134
9.8.1.4: Overturning	135
9.8.1.5: Bearing Pressure	136
9.8.2: Internal Stability	136
9.8.2.1: Tensile Overstress	139
9.8.2.2: Pullout	139
9.8.2.3: Internal Sliding	139
9.8.2.4: Connection Capacity	141
9.8.2.5: Crest Toppling	141
9.8.3: Internal Compound Stability (see Section 8)	142
9.9: Example Calculation	144
SECTION 10: DRAINAGE DESIGN AND WATER CONSIDERATIONS	145
10.1: Overview of Water Considerations	145
10.2: SRW Drainage Componets	145
10.2.1: Gravel Fill (Drainage Aggregate)	146
10.2.2: Drain Pipe	146
10.2.3: Filters (Geotextile or Gravel)	147
10.2.4: Blanket Drain	149
10.2.5: Chimney Drain	150
10.2.6: Drainage Swale	150
10.3: Subsurface Drainage Capacity Design	150
10.3.1: Drains Directly Behind the SRW Units	150
10.3.1.1: Reinforced Soil Walls	150
10.3.1.2: Gravity Walls	152
10.3.2: Drain at the Back of Reinforced Soil Zone	152
10.3.2.1: Flow into the System	152
10.3.2.2: Flow into the Drain	152
10.3.2.3: Outlets	153
10.3.3: Drain at Subgrade and Reinforced Soil Mass Interface	153
10.4: Filtration and Permeability	153
10.4.1: Soil Filtration	153
10.4.2: Geotextile Filtration	155
10.4.3: Soil Permeability	156
10.5: Water Bodies in Front of Walls	156
10.5.1: Foundations	157
10.5.2: Rapid Draw Down	157
10.5.3: Bouyant Soil Weights	158
10.5.4: Reinforced Fill for Waterfront Applications	159
10.5.5: Scour and Erosion	159
10.5.6: Ice Forces in Front of Wall	159
SECTION 11: DESIGN GUIDELINES FOR SITE CIVIL ENGINEER	161
11.1: Wall Layout and Civil Drawings	161

11.2: Surface Drainage Design Considerations Around SRWs	162
11.3: Grading for Surface Drainage Around SRWs	163
11.4: Erosion and Scour Issues	163
11.5: Stormwater Collection–Catch Basin/Drop Structures	164
11.6: Drainage Structure Outlet Pipes Passing through SRW Face	164
11.7: Stormwater Management Ponds	164
11.8: Waterfront Application Walls	165
11.9: Utilities within Reinforced Soil of SRWs	165
11.10: Underground Stormwater Detention Structures and Permeable Pavements	165
11.11: Snow Management	165
11.12: Fencing, Guide Rails, and Traffic Barriers	166
SECTION 12: DESIGN GUIDELINES FOR PROJECT GEOTECHNICAL ENGINEER	167
12.1: Geotechnical Investigations	167
12.1.1: Subsurface Exploration	168
12.1.2: Laboratory Testing	168
12.2: Geotechnical Properties for SRW Design	169
12.2.1: Soil Properties for the SRW Engineer	169
12.2.2: Soil Type Classification	170
12.2.3: Soil Shear Strength	170
12.2.4: Groundwater Data	170
12.2.5: Other Geotechnical Properties	171
12.3: Foundation Evaluations and Recommendations	171
12.3.1: Gravity SRW Bearing Capacity	171
12.3.2: Soil Reinforced SRW Bearing Capacity	173
12.3.2.1: Base Eccentricity	174
12.3.3: Groundwater Effects on Bearing Capacity	174
12.3.4: Foundation Settlement Prediction	176
12.3.5: Improving Foundations	176
12.4: Global Stability Around SRWs	177
12.4.1: Ensuring All Critical Failure Surfaces are Evaluated	177
12.4.2: Effect of Groundwater on Global Stability	178
12.4.3: Improving Slope Stability	179
SECTION 13: CONSTRUCTION OF SEGMENTAL RETAINING WALLS	181
13.1: Construction Drawings and Specifications	181
13.2: Construction Details	181
13.3: Construction Planning	184
13.4: Construction Sequence	184
13.5: Construction Tolerances	184
13.5.1: Dimensional Tolerances for SRW Construction	184
13.5.2: Materials Acceptance	191
13.5.3: Earthwork Monitoring and Testing	191
13.5.4: Geosynthetic Reinforcement	191
13.5.5: Gapping and Cracking of Concrete Units	191

13.5.6: Incidental Movement	191
13.6 Post Construction Activities.....	192
SECTION 14: SAMPLE SPECIFICATIONS	193
14.1: Material Specification	193
PART 1: GENERAL	194
PART 2: MATERIAL.....	197
PART 3: CONSTRUCTION	200
PART 4: MEASUREMENT AND PAYMENT.....	202
APPENDICES	203
Appendix A: Conventional Single Depth SRW	205
Appendix B: Reinforced Soil SRW	215
Appendix C: Determination of Long-Term Design Strength, Ltds of Geosynthetic Soil Reinforcement.....	261
METRIC CONVERSION TABLE	267
NOTATIONS AND ABBREVIATIONS	269
